

## Travel Clock Transmitter UHF – CLOCKTX

### FEATURES

- § Digital travel alarm clock with calendar and night illumination
- § Clock operates independently from transmitter
- § High sensitivity ported microphone for 10m pick-up
- § Internal antenna arrangement

Ideal for use in both travel and domestic situations, this fully functioning alarm clock contains a concealed transmitter and microphone. Two ordinary batteries power the unit; the first operates the clock, while the second powers the transmitter. When the second is fitted, the transmitter is activated and will operate for up to 5 days continuously. The microphone is sensitive enough to capture every sound in the largest of rooms and can even capture sound from adjacent rooms if doors between them are open.

\* For export outside the EC only

### TECHNICAL SPECIFICATIONS

Typical Performance Characteristics - at 20 degrees C

<b>Dimensions:</b>	95mm x 60mm x 45mm
<b>Battery:</b>	2 x AAA Alkaline
<b>Battery Life:</b>	5 days approx
<b>Transmission Power:</b>	15mW
<b>Frequency control:</b>	Independent quartz crystal
<b>Frequency accuracy:</b>	Better than 0.0005% or receive frequency
<b>Modulation:</b>	Narrow Band FM 3 KHz bandwidth
<b>Microphone:</b>	Ported Electret condenser with FET amplifier
<b>Frequency Range:</b>	350 to 600 MHz preset with crystal
<b>Spurious emissions:</b>	Better than -50dB of transmission frequency
<b>Operating Temperature:</b>	-10 to +60 CC
