

Telephone Splitter Transmitter UHF – SPLTX

FEATURES

- § Listen or record both sides of all telephone conversations
- § Easily fitted, simply plugs in to telephone socket
- § Line powered, no batteries required

This ordinary looking telephone splitter has a transmitter built inside. Simply plug it in to the target socket and it will allow all calls to be monitored using our URX2 receiver and recorded if desired. The device is line powered so requires no batteries and is suitable for all conventional analogue telephone systems.

* For export outside the EC only

TECHNICAL SPECIFICATIONS

Typical Performance Characteristics - at 20 degrees C

Power:	Series Connection to Telephone Line
Transmission Power:	15mW
Frequency control:	Independent quartz crystal
Frequency accuracy:	Better than 0.0005% of receive frequency
Modulation:	Narrow Band FM 3 KHz bandwidth
Frequency Range:	350 to 600 MHz preset with crystal
Spurious emissions:	Better than -50dB of transmission frequency
Operating Temperature:	-10 to +60 C
