

Telephone Transmitter UHF – TELTX

FEATURES

- § Listen or record both sides of all telephone conversations
- § Can be fitted inside telephone socket
- § Line powered, no batteries required

This tiny telephone transmitter can be connected anywhere along a telephone line. It can be concealed inside a socket or even inside the telephone itself. This device allows all calls to be monitored using our URX2 pocket receiver. Both sides of all conversations will be heard with perfect clarity and, if desired, a voice-activated recorder can be used in conjunction with the receiver for unattended recording. The transmitter is powered by the telephone line so once installed requires no further attention. Designed for use in conventional analogue telephone systems.

* For export outside the EC only

TECHNICAL SPECIFICATIONS

Typical Performance Characteristics - at 20 degrees C

Dimensions:	22 x 12 x 8 mm
Power:	Series Connection to Telephone Line
Transmission Power:	15mW
Frequency control:	Independent quartz crystal
Frequency accuracy:	Better than 0.0005% of receive frequency
Modulation:	Narrow Band FM 3 KHz bandwidth
Frequency Range:	350 to 600 MHz preset with crystal
Spurious emissions:	Better than -50dB of transmission frequency
Operating Temperature:	-10 to +60 C
